Solar Direct

Alternative solutions for home, business, and industry

■ Solar Direct is the renewable market's premiere one-stop source for a wide spectrum of products and services

Solar Direct not only hosts the Internet's top visited e-commerce destination for renewable technology, the Energy SuperMarket, Solar Direct also provides a wide range of traditional offline solutions for residential, commercial, recreational, industrial, agricultural, educational, governmental, and all offgrid applications:

• Solar Freedom™ PV Electric Packages

Residential Applications; DIY Starter Kits for entry-level solar photovoltaic [PV], combines immediate and reliable power backup, regular monthly utility savings, and the long term ability to expand the system to achieve total energy independence - an all-in-one modular package!!! System is grid-interconnected with battery backup storage. [More»](#)

New 2005 Energy Policy offers federal tax credits worth 30% of the total system cost! [More»](#)

Parts and Supplies; all Solar Freedom DIY Kits are supported by a complete line of solar electrical parts and supplies, along with many system enhancing accessories; solar PV panels, photovoltaic modules for both off-grid [stand-alone] and grid-interconnected [grid-tie] systems, solar charge controllers, inverters, deep-cycle batteries, solar PV panel fixed mounting racks, single and dual axis tracking units, miscellaneous hardware, all allowing easy expansion of the Solar Freedom Package system. [More»](#)

• Solar Water Heating Systems

Residential Applications; Solar Water Heating [SWH] combines greatest return on investment and most efficient form of solar energy currently available. SWH is affordable and immediate way to start dramatically reducing electric, propane, or natural gas utility costs. Active and Passive residential SWH systems are both available. [More»](#)

New 2005 Energy Policy offers federal tax credits worth 30% of the total system cost! [More»](#)

Parts and Supplies; all Solar Water Heating Systems and DIY Kits are supported by complete line of solar water heating parts and supplies, along with many system enhancing accessories;

For Active Solar heaters: collector panels, glazing, changeout panels, absorbers, mounting hardware, struts, solar hot water storage tanks, drain pans, thermostats, elements, controls, pumps, valves, pressure relief valves, vacuum breakers, air vents, freeze protection valves, active heat exchangers, pressure expansion tanks and anti-freeze transfer fluids. [More»](#)

For Passive Solar Heaters: collector panels, glazing, changeout panels, mounting hardware, struts, valves, and fittings. [More»](#)

For Tankless Heaters: electronic components, plumbing components, temperature remote controllers, back flow prevention vents, mounting brackets for both electric and gas models. [More»](#)
