## *Attic Breeze Named Recipient of 2011 Eureka! Awards*

Attic Breeze, LLC is proud to be chosen by the Texas State Energy Conservation Office as a winner of the first ever Eureka! Awards. Recognizing the best in energy efficiency products in Texas, The Eureka! Award Program promotes innovations in green technologies designed to benefit the Texas economy. This one-time grant program is funded by the American Recovery and Reinvestment Act of 2009 (ARRA).

On May 9, 2011, the Texas Comptroller of Public Accounts awarded Eureka! grants to six Texas-based businesses identified as market leaders in energy efficiency or renewable energy products. Judged by a review committee consisting of notable energy industry professionals, Attic Breeze was among those companies selected for the prestigious award.

Located in Gatesville, Texas, Attic Breeze manufactures solar powered ventilation equipment designed to minimize consumer electricity bills by continuously removing heat from the attic throughout the day. For more information on Attic Breeze products, please visit our website at [www.atticbreeze.net](http://www.atticbreeze.net).
