BARACUDA[®]

Its a pool cleaner, not a fish

ZODIAC

Zodiac G4

The all-new Zodiac G4 is the ultimate in pool cleaning, designed to give you more time in your pool and less time maintaining it. With advanced features that harness the best of Zodiac's knowledge of nautical technology, the Zodiac G4 has been engineered to slice through your pool with little effort, picking up dirt and debris and assisting the water circulation throughout your pool.

Long Life Diaphragm (inside)

The only moving part within the Zodiac G4. It is so easy to remove from the quick release cassette for maintenance. No gears, flappers, wheels or noisy hammers, just trouble free maintenance that is so quiet, your neighbours will never complain!

Hull

The structurally rigid component to which all main components are fastened, that houses the diaphragm.

Buoy & Keel

Provide balance and stability that allows a smooth directional path over the pool surface.

Fins

Designed to enable the Zodiac G4 in climbing over main drains, lights and return fittings without getting stuck.

Rudder

Gives the Zodiac G4 better balance and directional stability that allows enhanced coverage and thorough cleaning.

Directional Strakes (underneath)

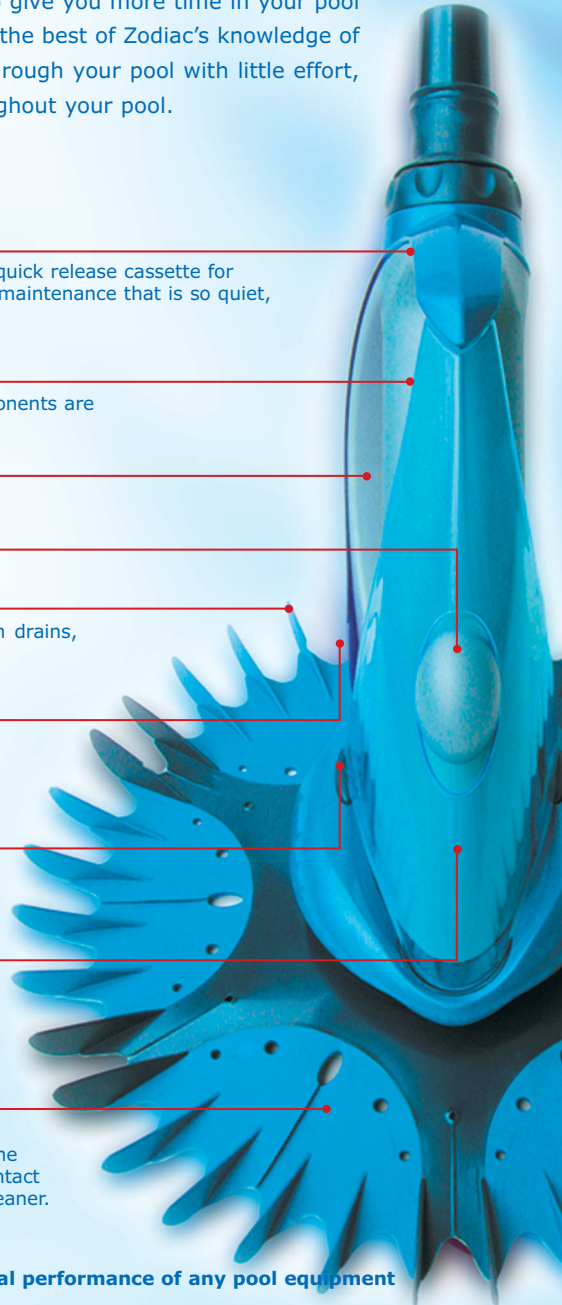

Assist Rudder function by steering the Zodiac G4 in a random pattern through the pool.

Sail

Made from clear XYLEX™ resin, designed to last longer and resist fading. Creates a "downdraft" effect that gives maximum adhesion and surface coverage.

Dual Contact Disc

Next generation disc technology pioneered by Zodiac. Works with the Sail to maximise contact with the pool surface giving you a beautifully clean pool. The rigid inner support system provides strength and structure for the internal contact pads that provide a gentle motion to pick up and direct fine debris into the cleaner.

Other Products in the Zodiac family include:

Saltwater Chlorinators made with Clearwater technology

Nature2 Mineral Purifiers for Pools & Spas

Zodiac Pools made with DriClad & KD technology

Zodiac Recreation & Commercial Boats

Zodiac recommends the following water chemistry readings for optimal performance of any pool equipment

	Free Chlorine	pH	Total Alkalinity (ppm)	Calcium Hardness(ppm)	Cyanuric Acid (ppm)
Australian Standard	1 - 3 ppm	7.2 - 7.8	80 - 300	90 - 300	30 - 50
Ideal reading/range	1 - 3 ppm	7.5	80 - 140	150 - 175	50
To increase*	Add chlorine or increase output of equipment	Add buffer or soda ash (sodium carbonate)	Add sodium bicarbonate	Add sodium calcium chloride	Add cyanuric acid
To decrease*		Add muriatic acid	Add muriatic acid or dry acid	Partially drain & refill pool	Partially drain & refill pool

*When using chemicals, always follow manufacturers directions and follow the advice of your pool professional. Always use protective clothing, gloves & glasses. Store & use chemicals out of the reach of children.
