

With its new advanced design, Honeywell AMX300 Series Mixing Valve Kits take ease of installation – and your profits - to the next level.

A standard mixing valve installation requires time-intensive labor and additional parts, which can be a drain on your profits. That's why we've packaged the AMX300 mixing valve with a cold water tee and flexible connector in an easy-to-buy kit, eliminating the need

for additional parts. This innovative design fits perfectly on a water heater, making it effortless to install. It all adds up to increased profit for you, and happy customers who enjoy more usable hot water and protection from scalding.

AMX300 Thermostatic Mixing Valve Kit

EVERYTHING YOU NEED FOR EFFORTLESS INSTALLATION AND INCREASED PROFITS

Teflon® Coating – Reduces hard water scale build-up to increase product life and reduce callbacks

Advanced Hot Water Applications – Integrated auxiliary hot water port allows for optional use of unmixed hot water for dishwasher or laundry applications

Advanced Cold Water Applications – Integrated auxiliary cold water port allows for optional use of cold water without additional tees for applications such as icemakers

Meets Lead-free codes – All of our AMX300 mixing valves are now available in Low-Lead-Content version

Easy Recirculation – Integrated port allows for optional connection to a domestic hot water recirculation loop

Simple Adjustment – Push & Lock Handwheel makes temperature adjustment simple and reliable

ASSE 1017 Approved – AMX300 mixing valve approved for point-of-source requirements

Part Number*	Description	Connection to tank	Connection to system	Max/Min Flow
AMX300T	Kit includes mixing valve, cold water tee, 8" flex connector	3/4" FNPT	3/4" MNPT	19/0.25 GPM
AMX302T	Kit includes mixing valve, cold water tee, 11" flex connector	3/4" FNPT	3/4" MNPT	19/0.25 GPM
AMX300	Mixing valve (for replacement only)	3/4" FNPT	3/4" MNPT	19/0.25 GPM

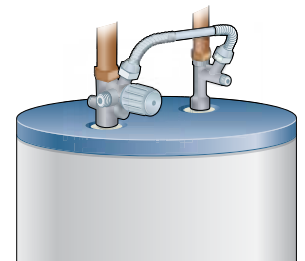

*For the part number of a Low-lead-content version, simply add "LF" at the end of the regular valve part number.
