SWIMMING POOL/SPA HEAT PUMPS

OUR MOST EFFICIENT POOL & SPA HEAT PUMP!

AT550 FEATURES

PC LOGIC CONTROLS

- reliable advanced digital microprocessor
- digital temperature settings for superior accuracy
- self diagnostic readouts eliminate needless service calls
- dual thermostat for pool and spa settings
- interfaces with all computerized pool/spa controls
- smart defrost control allows unit to operate to lowest possible temperatures

ULTRAVIOLET LIGHT PROTECTED ABS PLASTIC CABINET

- will not rust, corrode or crack
- molded fan cowling maximizes air flow across evaporator coil and reduces fan noise

SCROLL COMPRESSOR

- high efficiency, quiet operation
- superior design compared to piston compressors
- assures years of trouble free operation

PATENTED TITANIUM ALLOY HEAT EXCHANGER

- ultimate protection against corrosion due to pool chemical imbalances
- allows full flow of water through heat exchanger up to 70 gallons per minute
- increases heating performance and efficiency, lowering operating costs

15 YEAR LIMITED WARRANTY

AT550 TITANIUM

HEAT OUTPUT.....	102,500 BTU/HR*
COEFFICIENT OF PERFORMANCE.....	6.2*
VOLTAGE/HZ/PHASE.....	208V-230V/60HZ/1 PH
MIN/MAX BREAKER.....	40/60
MIN/MAX WATER FLOW.....	30/70
DIMENSIONS.....	37"H X 33"W X 39"L
SHIPPING WEIGHT.....	318 LBS
<i>SPECIFICATIONS MAY CHANGE WITHOUT NOTICE</i>	

*Based on 80° pool water/80° ambient air temperature/80% humidity

AT550

TITANIUM

**MAXIMUM EFFICIENCY =
LOWER OPERATING COSTS!**

In today's climate of ever increasing energy costs, pool owners looking to extend their swim season want maximum efficiency from their pool heater. Aquatherm's latest model AT550 features our trademark high quality swimming pool heat pump design and is the highest efficiency unit we've ever offered. Each of the major components in the AT550 is perfectly matched to create maximum efficiency. The Aquatherm AT550 generates heat for as much as 33% less than some pool heat pumps and 80% less than propane gas heaters.

SWIMMING POOL/SPA HEAT PUMPS
